[in](#) LinkedIn | [G](#) Github | [T](#) Tech Blog

Seoul, South Korea

EXPERIENCE

• AGI Lab

Research Intern

June 2024 - Present

Ewha Womans University

- LLM Evaluation, Uncertainty Estimation, Trustworthiness of AI

• Prometheus

Team Member & Core Member of Development

Sep. 2025 - Present

Union AI Club

- Build a full outfit recommendation system based on persona, TPO and selected items by using LLM prompt engineering.

• Department of Artificial Intelligence Student Council

Planning Committee Member

Mar. 2023 - Dec. 2024

Ewha Womans University

- Organized academic and social events for AI majors, including orientation and school festival.

EDUCATION

• Ewha Womans University

B.S. in Artificial Intelligence

Mar. 2023 - Present

Seoul, South Korea

- GPA: 4.29/4.3

PUBLICATIONS

W=WORKSHOP, B=BOOK

[W.1] Minsuh Joo, Hyunsoo Cho. (2025). **Cleanse: Uncertainty Estimation Approach Using Clustering-based Semantic Consistency in LLMs**. In *Proceedings of the GEM Workshop at ACL 2025*.

[B.1] Yoonseo Chung, Jeonghyun Kim, MiYeon Kim, Minsuh Joo, Hyunsoo Cho. (2025). **Foundations of LLMs and Financial Applications**. *Finance and Large Language Models, Springer Nature*, ISBN: 978-981-96-5832-9.

PROJECTS

• CORDE: Full Outfit Recommendation Chatbot

Tools: Python, PyTorch, NumPy, pandas, FastAPI, CSS, HTML, FAISS

Sep. 2025 - Feb. 2026

- Collected item image and metadata from musinsa (a Korean fashion store) and constructed two databases which include style DB and TPO DB, using FAISS vectorstore.
- Defined 6 personas based on survey, which resulted in causal, formal and street fashion categories.
- Retrieved top-5 style-based and TPO-based relevant items and return top-3 items by considering the weighted sum score and LLM reranking.
- Based on user's selected persona, TPO, and negatives (fit, pattern, and price), chatbot recommends items sequentially and complete the full coordination. Human can give a feedback if the recommended results are unsatisfactory.

• Enhancing a QA performance of LLM using RAG and Prompt Engineering

Tools: Python, PyTorch, NumPy, pandas, FAISS

Oct. 2025 - Dec. 2025

- Used a LLM router to utilize different prompts depending on the question type (school rules or MMLU).
- Implemented RAG for each option, motivated by running RAG once for the entire question often fails to retrieve sufficient context for every specific options.
- Leveraged ensemble in order to ensure a more stable and robust final answer through majority voting.
- Achieved a 88% accuracy for validation set and 81% for test set (3rd place).

• Minesweeper Implementation using Deep Q-Network (DQN)

Tools: Python, PyTorch, NumPy, pandas, matplotlib

May 2024 - July 2024

- Implemented most of the game environment entirely from scratch using functions.
- Significantly improved win rate and cumulative score through effective normalization.
- Designed a concrete and fine-grained reward system tailored to the Minesweeper environment.
- Achieved a training win rate of 65% and a test rate of 56%.

HONORS AND AWARDS

• LG Aimers 8th AI Hackathon 3rd Prize: Lightweight EXAONE-4.0 <i>DACON</i>	2026
• National Science and Engineering Scholarship <i>Korea Student Aid Foundation (KOSAF)</i>	2025 
• MIXUP AI Datathon 3rd Prize: Upstage Solar API Prompt Engineering <i>Prometheus, Tobigs, BITAmin</i>	2025
• Top Student in Artificial Intelligence Major <i>Ewha Womans University</i>	2025
• Undergraduate Research Opportunities Program (UROP) <i>Ewha Womans University</i>	2024
• Second Highest GPA Student of the College <i>Ewha Womans University</i>	2024
• Top Student of the College <i>Ewha Womans University</i>	2024

SKILLS

- **Programming Languages:** Python, C
- **Database Systems:** SQL
- **Data Science & Machine Learning:** PyTorch, HuggingFace
- **Mathematical & Statistical Tools:** Calculus, Linear Algebra
- **Other Tools & Technologies:** LaTeX
