Seoul, South Korea

EXPERIENCE

- **AGI Lab** June 2024 - Present
Research Intern Ewha Womans University
 - LLM Evaluation, Uncertainty Estimation, Trustworthiness of AI
- **Prometheus** Sep. 2025 - Present
Team Member & Core Member of Development Union AI Club
 - Build a full outfit recommendation system based on persona, TPO and selected items by using LLM prompt engineering.
- **Department of Artificial Intelligence Student Council** Mar. 2023 - Dec. 2024
Planning Committee Member Ewha Womans University
 - Organized academic and social events for AI majors, including orientation and school festival.

EDUCATION

- **Ewha Womans University** Mar. 2023 - Present
B.S. in Artificial Intelligence Seoul, South Korea
 - GPA: 4.29/4.3

PUBLICATIONS

W=WORKSHOP, B=BOOK

- [W.1] **Minsuh Joo**, Hyunsoo Cho. (2025). **Cleanse: Uncertainty Estimation Approach Using Clustering-based Semantic Consistency in LLMs**. *In Proceedings of the GEM Workshop at ACL 2025*.
- [B.1] Yoonseo Chung, Jeonghyun Kim, MiYeon Kim, **Minsuh Joo**, Hyunsoo Cho. (2025). **Foundations of LLMs and Financial Applications**. *Finance and Large Language Models, Springer Nature*, ISBN: 978-981-96-5832-9.

PROJECTS

- **CORDE: Full Outfit Recommendation Chatbot** Sep. 2025 - Feb. 2026
Tools: Python, PyTorch, NumPy, pandas, FastAPI, CSS, HTML, FAISS [\[G\]](#)
 - Collected item image and metadata from musinsa (a Korean fashion store) and constructed two databases which include style DB and TPO DB, using FAISS vectorstore.
 - Defined 6 personas based on survey, which resulted in causal, formal and street fashion categories.
 - Retrieved top-5 style-based and TPO-based relevant items and return top-3 items by considering the weighted sum score and LLM reranking.
 - Based on user's selected persona, TPO, and negatives (fit, pattern, and price), chatbot recommends items sequentially and complete the full coordination. Human can give a feedback if the recommended results are unsatisfactory.
- **Enhancing a QA performance of LLM using RAG and Prompt Engineering** Oct. 2025 - Dec. 2025
Tools: Python, PyTorch, NumPy, pandas, FAISS [\[G\]](#)
 - Used a LLM router to utilize different prompts depending on the question type (school rules or MMLU).
 - Implemented RAG for each option, motivated by running RAG once for the entire question often fails to retrieve sufficient context for every specific options.
 - Leveraged ensemble in order to ensure a more stable and robust final answer through majority voting.
 - Achieved a 88% accuracy for validation set and 81% for test set (3rd place).
- **Minesweeper Implementation using Deep Q-Network (DQN)** May 2024 - July 2024
Tools: Python, PyTorch, NumPy, pandas, matplotlib [\[G\]](#)
 - Implemented most of the game environment entirely from scratch using functions.
 - Significantly improved win rate and cumulative score through effective normalization.
 - Designed a concrete and fine-grained reward system tailored to the Minesweeper environment.
 - Achieved a training win rate of 65% and a test rate of 56%.

HONORS AND AWARDS

• LG Aimers 8th AI Hackathon 3rd Prize: Lightweight EXAONE-4.0 <i>DACON</i>	2026
• National Science and Engineering Scholarship <i>Korea Student Aid Foundation (KOSAF)</i>	2025 
• MIXUP AI Datathon 3rd Prize: Upstage Solar API Prompt Engineering <i>Prometheus, Tobigs, BITAmin</i>	2025
• Top Student in Artificial Intelligence Major <i>Ewha Womans University</i>	2025
• Undergraduate Research Opportunities Program Scholarhip (UROP) <i>Ewha Womans University</i>	2024
• Top Student of the College <i>Ewha Womans University</i>	2024

SKILLS

- **Programming Languages:** Python, C
- **Database Systems:** SQL
- **Data Science & Machine Learning:** PyTorch, HuggingFace
- **Mathematical & Statistical Tools:** Calculus, Linear Algebra
- **Other Tools & Technologies:** LaTeX
